Certificate

This is to certify that “**TUMU MANI SAI PAVAN**” of Class XII has prepared the report on the project entitled “**FAST TRAVELS – The Travel Assistant**”. The report is the result of the team’s efforts & endeavors. The report is found worthy of acceptance as final project report for the subject Computer Science of Class XII. They have prepared the report under my guidance.

Certificate

The project report entitled **“FAST TRAVELS – The Travel Assistant”**

Submitted by **TUMU MANI SAI PAVAN, Class XII** for
the CBSE Senior Secondary Examination, Class XII of
Computer Science at Sri Sathya Sai Institute of Educare,
Chromepet, Chennai – 600 044 has been examined.

Signature of Examiner

DECLARATION

I hereby declare that the project work entitled
“FAST TRAVELS – THE TRAVEL ASSISTANT”,
submitted to the Department of Computer Science,
Sri Sathya Sai Institute of Educare, Chromepet,
Chennai – 600044 which has been prepared by me
along with my team members **Theegela Satya Sai**
Varun Kumar, XII & Katakam Likith Kumar, XII.
All the coding is a result of our personal efforts.

Tumu Mani Sai Pavan, XII

ACKNOWLEDGEMENT

We would like to express a deep sense of thanks and gratitude to our project guide **Sri. V. Thyagarajan** for guiding us throughout the course of this project. He always evinced keen interest in our work. His constructive advice and constant motivation have been responsible for the successful completion of this project.

Also, our sincere thanks go to **T.S Meera, Coordinator, Gajendiraraj Mohan,** Department of Computer Science for their co- ordination in extending every possible support for the completion of this project.

Our thanks from the bottom of our hearts to **Sri P. Kumarasamy, Director, Sri S. Loganathan, Correspondent, N.Vedhanayagi, Vice Prinicpal, Srmt. Savithri Chandrasekaran Principal, Late Smt. K. Saimeera, Principal** for their dedicated efforts in providing us the best of the facilities to complete the project.

For the most part, we also thank our parents for their strong motivation and support in completion of this project. We also thank our classmates for their timely suggestions and appreciations.

Last but not the least, we express our gratitude at the Divine lotus feet of our **SADHGURU BHAGAWAN SRI SATHYA SAI BABA** for showering His immense blessings on us and guiding us being our inner consciousness to complete this project.

Tumu Mani Sai Pavan, XII

INDEX

MODULES USED

1. os – for using OS functions.
2. pywhatkit – for connecting YouTube, Google.
3. random – for getting random numbers.
4. datetime – for getting date & time.
5. mysql.connector – for connecting SQL with python.
6. pyttsx3 – for text to speech conversion.
7. covid – for getting covid cases
8. numpy – for performing math operations.
9. matplotlib.pyplot – for plotting graphs.
10. smtplib, ssl – for sending e-mail.

WORKING DESCRIPTION

FAST TRAVELS – THE TRAVEL ASSISTANT

Introduction

In a year, around thousands of Travel apps get developed in India. But, many of the apps are fake, and not trusted by the customers. According to the recent study, it shows that people aren't satisfied with the travel booking apps due to Lack of accuracy, High prices, Technical issues, Entertainment, etc.

This is the reason we have created a Python based application called "FAST TRAVELS" and that's why our motto is :

"FOR THE BEST AND ACCURATE TRAVEL, USE FAST TRAVELS."

The current COVID-19 pandemic has had an immense effect on every single person. This in fact is one of the main reasons why we were motivated to develop FAST TRAVELS. This application is made to make sure that everyone can enjoy in booking their tickets as it has immense features in it. Due to this pandemic, many persons have missed their own ones and some are not able to meet their relatives and are single which creates loneliness. Due to this we have also added the feature of talking which does not create loneliness to the users.

This project application is mainly made with Python 3.9.8. Modules play a vital role in the application's build. The application has enhanced code reusability which is an inherent part of OOP programing. Adaption to real life situation and understandable nature makes it more user friendly and reduces complexity of managing the database.

At present, this application is only made for the System Administrator.

Logo & Its Meaning

Our logo is a visual representation of our application's services that are levied in it. Our logo is an abstract **VECTOR ART BASED ILLUSTRATION** which constitutes of a **BIRD MADE WITH PAPER**, which means the application is as fast as bird and paper are. The **Bird** also signifies the availability of the app's services for 24/7 x 365 days. The **Bird** also signify the availability of the application's features in any location, especially in hilly, snowy and remote areas because of the major unavailability of services in such areas.

HOW TO USE FAST TRAVELS?

The administrator menu has got many options to use this program which are mentioned below:

- | | |
|-------------------------|------------------------|
| 1. BOOK TICKET | 6. CHECK DATE & TIME |
| 2. CHECK RUNNING STATUS | 7. WATCH VIDEO |
| 3. GIVE FEEDBACK | 8. GET INFO ON A TOPIC |
| 4. ENTER ADMIN CONTROL | 9. PLAY GAMES |
| 5. SEE COVID-19 STATS | 10. EXIT |

1) BOOK TICKET - For Booking Ticket

The user can book ticket by entering the following details:

- NAME
- PHONE NUMBER
- EMAIL-ID
- CARD NUMBER
- DATE OF EXPIRY
- CVV

If the user wants to pay offline, he may just enter his personal details.

After the data is entered with the conditions applied, the user has successfully booked ticket and his information is stored in the **FAST TRAVELS** database in MySQL & also will be stored in a Text File. The ticket will be sent to the person through an email within 5 minutes.

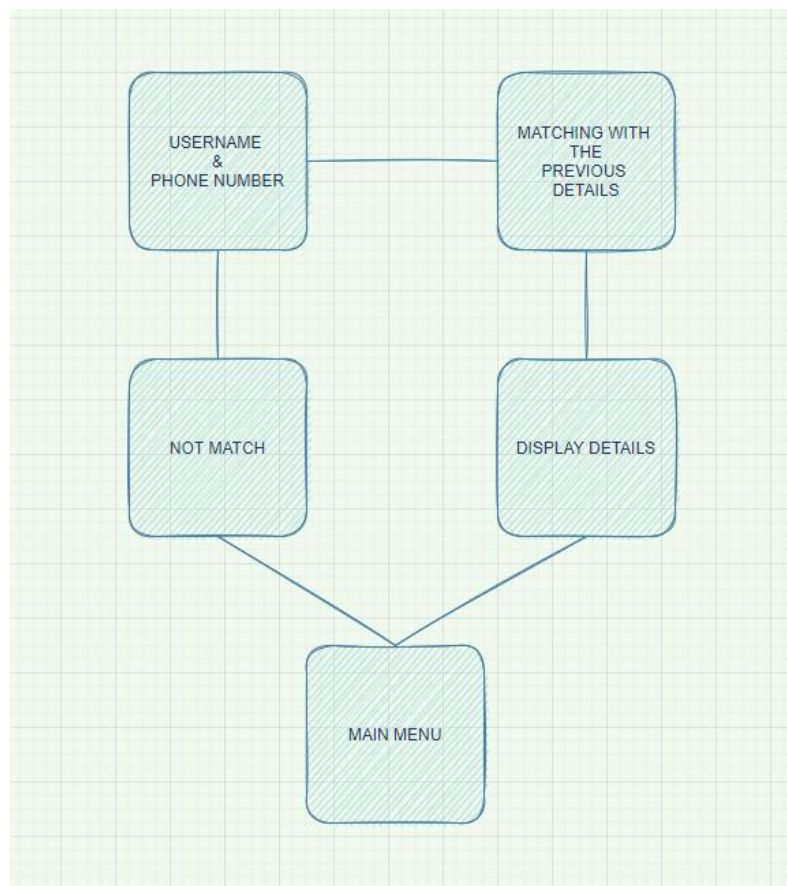

2) CHECK RUNNING STATUS OF BUSES

Running Status of Buses is very important in this modern world. So, we have included this feature in our application.

This feature can only be used by the person who booked his ticket previously.

The user can check the running status of buses by entering the Option 2. It lists all the buses and the present location of the buses.

The application will also provide details regarding the Driver's Name & Contact Number. So that the user may contact the driver if any difficulty arises. The driver will then assist the user according to the seriousness of the problem.

3) GIVE FEEDBACK

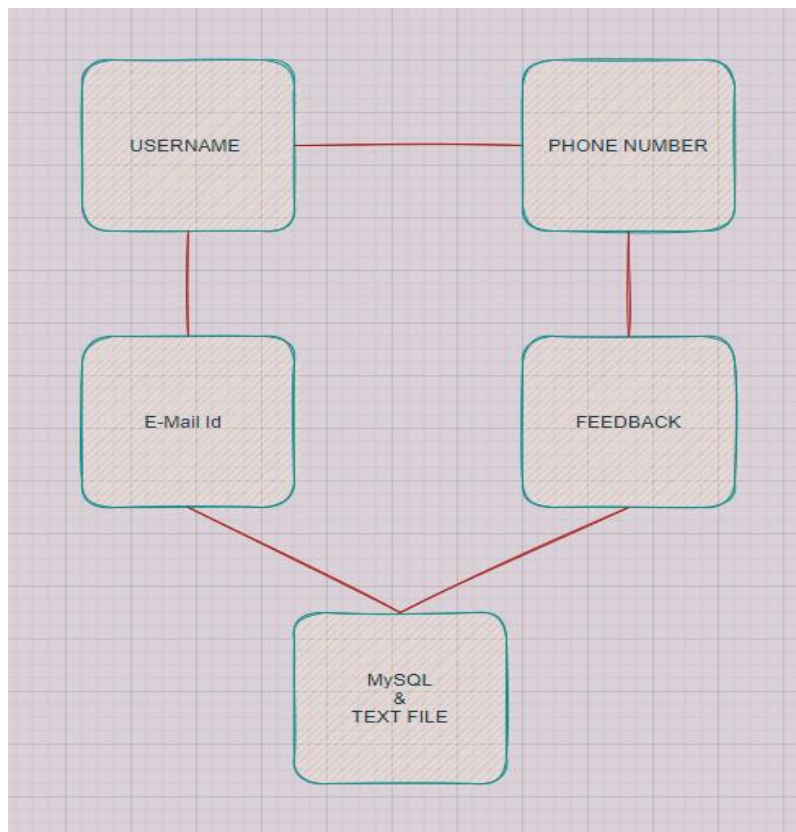

Every app needs some motivation for developing it further. People when being happy with the app wants to share their feelings towards the app.

So, we have included the feature of giving feedback.

It will store the following details :

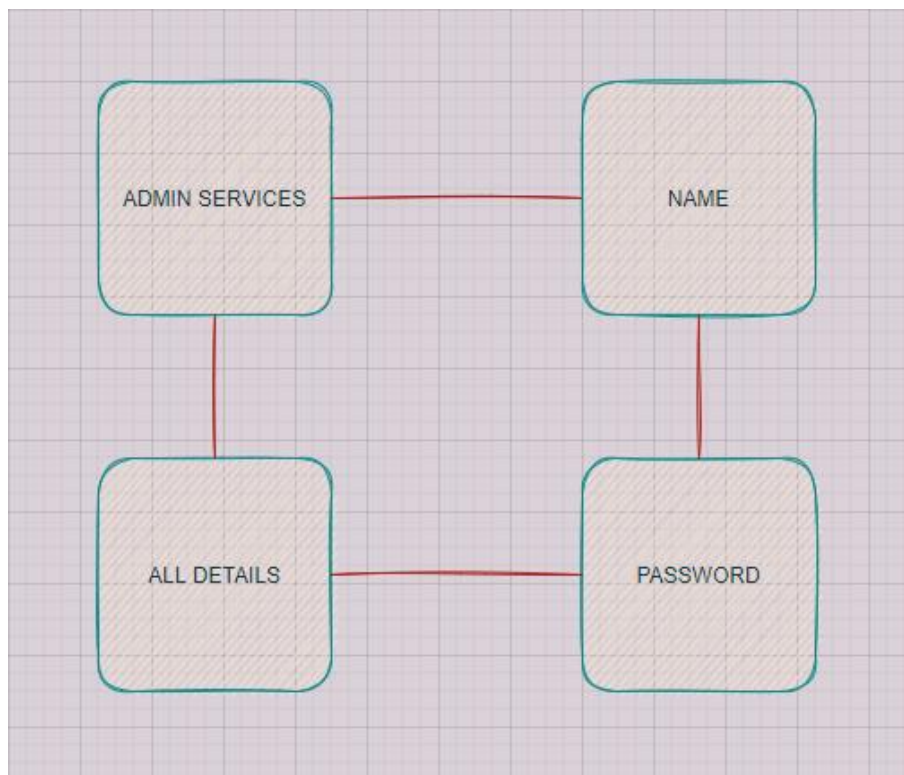

- 1) Name
- 2) Phone
- 3) E-Mail id
- 4) Feedback

All these will be stored in MySQL and in text file.

4) ADMIN CONTROL

This feature is accessible only for admin members (currently our team). This feature is made so that the admins can monitor what type of people are using the application and if these people are real or fake. This is to prevent future problems like safety of users and the application data. In this feature the admin has to first sign in with the one-time admin username and password. Then the admin can inspect all account details or delete registered accounts as well.

5) COVID-19 STATS – The COVID Count

The COVID-19 Stats is one of the special features in our application where the program provides 100% accurate real-time count of the preceding **POSITIVE COVID-19 CASES** and **DEATHS**. This includes the COVID-19 Statistics of the **World**. The foremost reason why we included this feature in our application is because we want each and every user to be aware and informed about the current situation, not only in their own precedence but everywhere around them too. At present it gives the entire World covid statistics.

6) PRESENT DATE & TIME

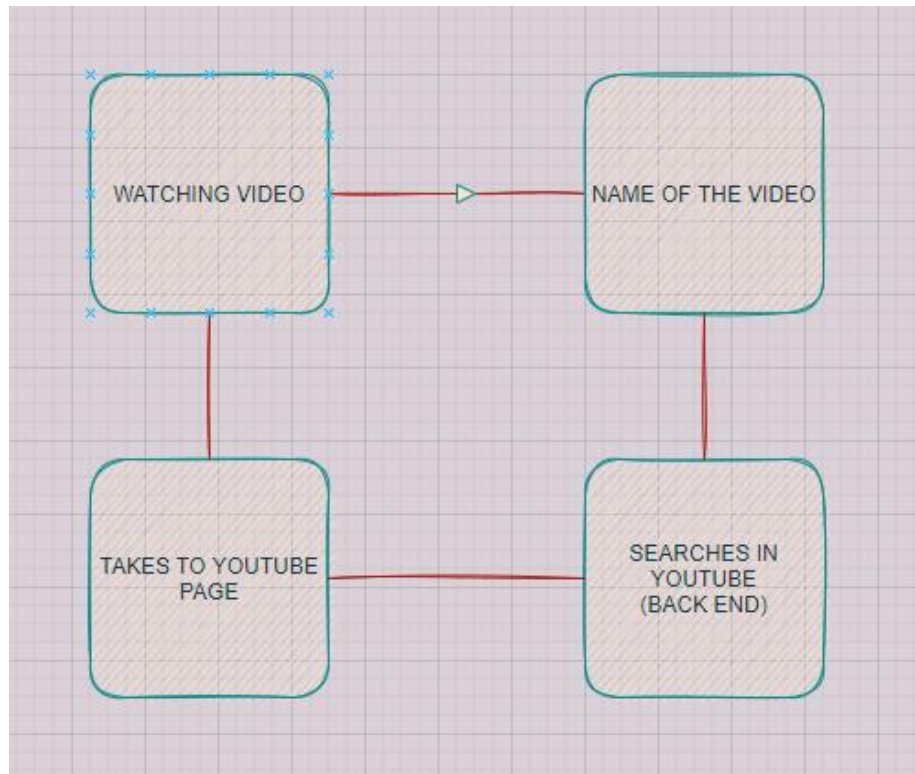

In today's modern world, most of the people are forgetting about the present date & time and booking their tickets in the wrong date & time. So, to get rid of this ambiguity, we have included this feature which prints present date & time so that they will travel on the right time & date.

7) WATCH VIDEO FROM YOUTUBE

Many users have the habit of saving their time especially in the case of Using computers. So, to save time from going to YouTube and then

searching videos, we have included this feature where the user enters the name of the video and application directly take to the video page in Google.

This also gives entertainment to the users.

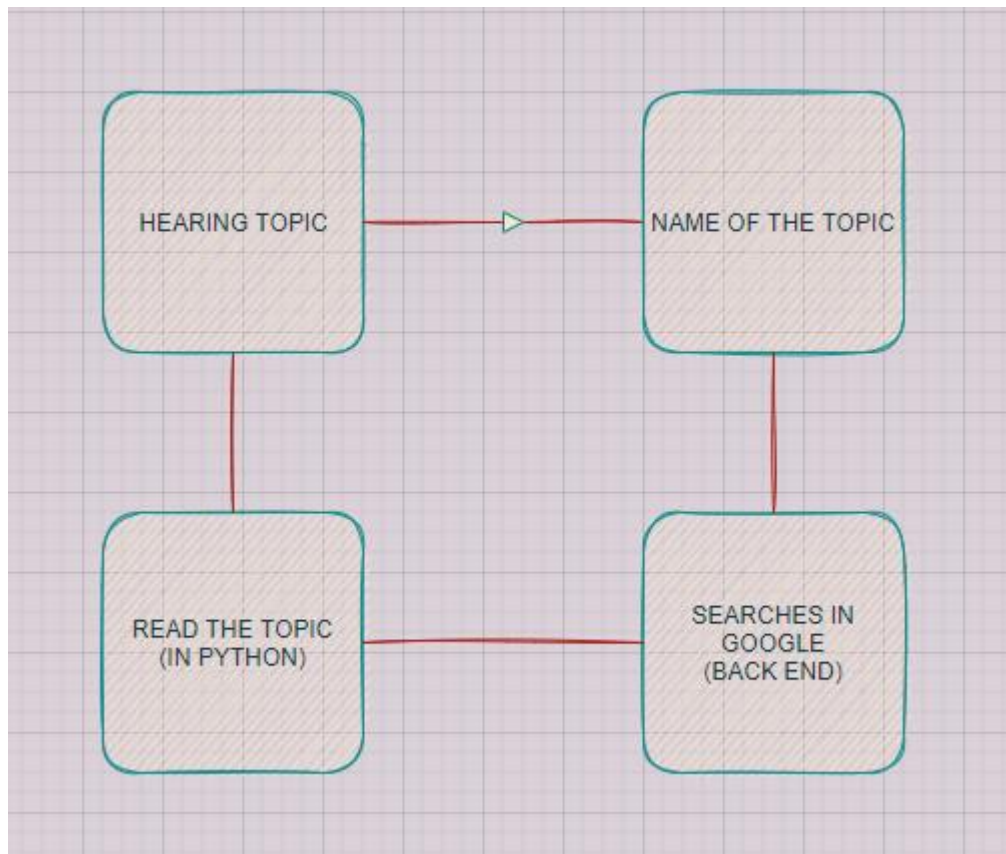

8) HEAR INFO FROM GOOGLE

In these days, everyone is feeling so difficult to read anything, instead they are just hearing it.

So, in our application too, we have included a feature where the user enters a topic and application will fetch information from Google and read it out to the user.

[CLICK HERE TO GO TO INDEX](#)

9) PLAY GAMES

In present situation, most of the people are engaged in games wherever they are. That's why we have also included this feature in this application

So, that they get some entertainment and get attracted towards this application which automatically makes them to book their next ticket in the same application.

As of now, we have created one game :

1) Random Number Game

10) EXIT

Once the user has used FAST TRAVELS, if they wish to exit, they can use this feature. In this feature, the user is asked whether they wish to proceed and stop using the application and once specified in a few seconds it will automatically stop running the program and exit the user login.

This program is currently been prepared for the System Administrator and it ensures that there is no Waste in time, Lack of accuracy, High prices and technical issues.

For other users, this program has to be modified so that the MySQL and few other features will not be available to them.

PROGRAM CODE

```
try:
    import os

Enter a topic name you want to hear : Gandhi

Successfully Searched !!!

Mohandas Karamchand Gandhi (; GAHN-dee; 2 October 1869 – 30 January 1948) was an Indian lawyer, anti-colonial nationalist and political ethicist who employed nonviolent resistance to lead the successful campaign for India's independence from British rule, and to later inspire movements for civil rights and freedom across the world. The honorific Mahātmā (Sanskrit: "great-souled", "venerable"), first applied to him in 1914 in South Africa, is now used throughout the world. Born and raised in a Hindu family in coastal Gujarat, Gandhi trained in the law at the Inner Temple, London, and was called to the bar at age 22 in June 1891. After two uncertain years in India, where he was unable to start a successful law practice, he moved to South Africa in 1893 to represent an Indian merchant in a lawsuit. He went on to live in South Africa for 21 years.
